

# apogaea 2017

This is a guide to art, camps, and events at Apogaea 2017.

Remember, however, that happenings *will* be occurring without a schedule or pre-planned location. Apogaea is what you make of it—the entertainment is what you and your fellow participants create.

Whatever your special talent might be, share it with us!

Art, events, and camps marked with an \* indicate they received a supporting grant from Apogaea in 2017.

## ART INSTALLATIONS

(See map or visit Info Booth for locations...or just explore!)

**\*All of You** - A semicircular arrangement of six mirrored mosaics. Participants can experiment with distance, angle, and motion to experience fragmented expansion, separated replication, and strobing of movement. As a viewer moves further from the installation, their reflection inverts, and then disintegrates into an abstract arrangement of light. **All of You** will be continuously influenced by sky light and its surrounding environment. The goal of the artist is to catalyze the consideration of an expansive, shared, ever-changing existence. *Crew/Artist: Mike Lustig*

**\*Almighty Lite-Brite** - Remember creating unicorns and rainbows on your Lite Brite, back when life was simple and cough syrup tasted like candy? Relive your fondest childhood memories on the **ALMIGHTY LITE BRITE**...a souped-up and super-scaled-up Lite Brite for Apogaea's young and young at heart. Larger than a grown man...more pegs than you could moop in a drunken stupor...and enough light to power a very (very) small village. *Crew/Artist: Jill Katzenberger and Piper Merriam*

**\*Apogaea's Original Banana Stand** - Come on down to The Big Yellow Joint and have a frozen banana and meet up with your pals! We will be gifting 200 frozen, chocolate-covered, bananas to the big and little participants of Apogaea. We'll also have other banana-flavored goodies to gift. The Banana Stand will be a great place for hop-ons, magicians, brothers, bow-tie-wearing seals, and Mother! **Daily 11:00 a.m. to 5:00 p.m.** *Crew/Artist: Diane Overbye and Dan Singer*

**\*Bongfire** - A series of small fire sculptures that come together to form an array of propane fire, dazzling lights and most importantly: water. A clear plenum houses a column of water with propane bubbles rising from the bottom. The propane bubbles burst at the surface, mix with air, then burn off. Further mesmerizing display is provided by color changing lights illuminating the bubbling water. Placed in the **Event Horizon** sound camp! **Daily 7:00 p.m. to 4:00 a.m.** *Crew/Artist: Evan Beloni*

**Burn Barrels** - Burn barrels to keep you warm and spark conversation! Propane-powered, depending on fire ban status.

**Burnin' to the Beat** - Ruben's tubes! Sound reactive fire art! Talk into the mic to see your voice on fire. Please bring any instruments you play, jokes or stories you have to tell, and/or music you'd like to hear and then see them on FIRE! We have a soundboard and all the cables to make it happen. Now all we need is your creativity and participation. **Daily 9:00 p.m. to 4:00 a.m.**

**\*Camp Wardrobe MalFUNKtion's Majestic Arch of Fashion Splendor** - Come strut your new burner wear along our fashion runway, adorned with a spectacular flaming arch, designed by Jed Winters Fabrication. This alter-ed ego is an homage to fashion, and glam, with a little taste of funk tossed in for good measure! *Crew/Artist: Jules Pellerin "Maven of MalFUNKtion" and Jed*

**\*Club Smash Club** - A cathartic release through carnal expression. Smash hate, prejudice, and the disposable culture. Hone the human form with new tools. Provide a unique and immersive environment. Long live metal! *Crew/Artist: Todd Oliver and Metal Camp*

**\*Colossal Head** - An interactive video sculpture through which participants can have their face (processed with digital effects) projected on to the nine-foot disembodied head. When not being used by participants, pre-prepared video content will be mapped onto the head. *Crew/Artist: Ryan Peru and Lindsay Akiyama*

**Fire Spirit** - In loving memory of our dear friend Jay Ro—we will blast some sick fire. **Friday and Saturday at 9:00 p.m.**

**\*Heart of Gold (the Effigy)** - A sculpture with advanced flame effects (and surprises) for the 2017 Apogaea effigy. **Heart of Gold** is a collaborative piece of art, allowing community members to get involved in creating and operating the piece, offering opportunities for both new and experienced artists to learn more about fire arts and fabrication skills. The core sculpture of **Heart of Gold** is a gift to the Apogaea community and will be left in the care of Apogaea to use for future events. *Crew/Artist: Jed Winters, Mark Switzer, Brad Allen, and Jules Pellerin. In loving memory of Skyler and Isobel. Burn Night starts on Saturday at 9:00 p.m.*

**The Heart of Isobel** - In loving remembrance of Isobel Johns.

**\*Hotaru no Hikari: The Firefly Temple** - The Firefly Temple embraces the Japanese temple aesthetic; participants will have the opportunity to decorate one of the hundreds of flickering lanterns that will glow throughout the event. *Crew/Artist: Andrea Pliner and Tom Varani*

**\*Infinescent Garden** - A fire and light garden to inspire contemplation of the beauty and depth of the infinite universe around and within us. We are creating an experience for Apogaeans to find comfort in the chill of the night by wandering into our garden of metal flowers that burn and glow with heat and passion (propane or lights, depending on fire status). Fire and light are primal and represent passion, creativity and inspiration as a source of life itself. We combine that with flowers representing manifestations of the energy of the universe. *Crew/Artist: Camp Amalgamation*

**\*Laetor's Ladder** - In the Temple at Saguaro Man 2014, a small child's toy was found. Much discussion and whimsical "what-ifs" ensued. Now the toy is all grown up. Get some friends, pull the rope, and watch it flip and fall! *Crew/Artist: Rene and Chromatest*

**\*Late Nite Price is Right** - Back for 2017! Pricier! Righter! Now with more dildos! Get off on our fabulous prizes as we bring consumerist exuberance to Apogaea! Building upon Bob Barker's long obsession with genitalia, **Late Nite Price is Right** is a mashup re-appropriation of classic game show games reimagined for the discerning Burner. *Crew/Artist: Dead Horse Productions: Continual Beatings Since 2006*

**\*Los Diablos Pianos del Fuego** - A semi-circular array of propane flame effect devices, controlled wirelessly by an arrangement of digital musical instruments. *Crew/Artist: Aaron Wilson, Chuck Honeycutt, Dirty Frank, Danimal Holden*

**\*Love Within** - A journey of the self. Walk up to the art piece: a lovingly adorned box, the outside brightly painted and decorated. Inside is the magic. Read the inscription, then open the box as directed and you will be presented with yourself. Complete the answer through reflection.

**\*Man Pavillion LED Columns** - Nine columns linked together with arches and filled with LEDs

**\*Mercury Touchstone** - A twelve-foot-tall interactive space rocket covered in 6,000 LEDs. *Crew/Artist: Bad Astronauts and Brian Weatherhead*

**\*The Octopussy** - A medium-sized mutant vehicle that explores the depths of space and time. A radically internally illuminated octopus/cat hybrid creature, the **Octopussy**, has the ears and nose of a cat, but the eyes and tentacles of an octopus. Whether dancing in the glow or her 6000 multicolor sound-reactive LEDs, getting cuddly in her plush underwater lounge, or taking her on an intergalactic journey, the **Octopussy** will tickle your fancy and leave you wanting more. *Crew/Artist: Kitty KittyMeow, Guthrey Coy, and the Octopussy team*

**\*Outside In** - A unique audio immersive environment that envelops the artists and audiences in three-dimensional audio soundscapes, transporting visitors, artists, and musicians on acoustic journeys overlaid on the real-world local environment. **Outside In** is about merging and blurring environments, people, and experiences. There is no audience/artist separation; the artist/performer becomes part of the audience and the audience participates in and sometimes is the performance. There is no separation of the performance from external environments; sights, sounds, and smells are invited in and becomes part of the unique and transient performance, never to be repeated. *Crew/Artist: Jeff Merkel and the Signal-to-Noise Labs Sci-Art Collective*

**\*The Poop Deck** - An elevated deck on top of the Narwhal King Dome

**\*The Queen of the Night** - A space where shamanistic healing can be explored. A place where we can take ahold of our journey together by provide a catalyst to our shared experience with this representation of the unique beauty that exists within our temporal boundaries. The center piece is an artistic representation of a *Selenicereus grandiflorus* (commonly known as "The Queen of the Night"), a desert flower that blooms for only one night, once a year. This plant will be depicted in steel and will feature flame effects. This plant articulates the ephemeral nature of our experience with this place and time and we seek to inspire a sense of immediacy. The flower will sit atop a large steel mandala podium. *Crew/Artist: Caitlin Morris and Joshua Birkmaier*

**\*Scrabble Camp** - A fully functional 15-foot Scrabble board. *Crew/Artist: Cheryl and Dave Barrar*

**\*SoundPuddle** - An interactive space of visual-acoustic synesthesia. This spectrographically colorful dome illuminates sound on an immersive canopy of light. Visualize the spectral shapes of sound-space with any noise you can make. **SoundPuddle** has been redesigned from the ground up, and you will laugh, shout, and sing as thousands of solar-powered LEDs unify your ears and eyes. Bring your musical instruments and voices to create an unforgettable experience. Located at **Electron Village**. *Crew/Artist: John English, Austin Glaser, Kevin McWilliams, and crew*

**\*Speleomountain** - A whole mountain of cubes for you to climb, dance, and play upon. *Crew/Artist: Piper Merriam, Ian Bates, Seth Herd, Pete Lyons, David Pichara, Diana Sabreen and Fractal Tribe*

**\*StarDust** - Take a spin on **StarDust**, a 3D rotating star waiting to take YOU on a first class adventure though Apogaea and beyond! *Crew/Artist: Jana McKinny*

**\*Thereminus Rex** - A giant, blinking theremin that participants play using their bodies as controllers. Apogaeans can control the audio and visual output from T.Rex by interacting with the art piece's proximity sensors through dance, play, and collaboration. *Crew/Artist: Toni Klopfenstein, Brennen Bearnes, and the electron cloud*

What if that same economy devalued the collection of things and valued the good you make in that economy? What if this unlikely economy encouraged a community "good" monetary system that involved people providing currency value for companies that leave no trace? And what if this collection of ideas and seemingly implausible plans also provided the immediacy that we all seek in our daily lives, helping us to overcome barriers that stand between us, moving us from me-centered thinking to more we-centered thinking?
