

June 4 – 8, 2014
Emergence

Who, What, Where, When

Welcome to Apogaea 2014! The four sections in this guide will help you to find out what's going on – art installations, theme camps, ongoing events or installations, and scheduled events. You can use the icon legend to look up things such as what's going on at Center Camp, things to do with your kids, places to meet people, workshops and learning experiences, and tons of other stuff you never thought of!

Gate hours:

Wednesday, 6/4: 9 AM – 7:59 PM

Thursday, 6/5: 9 AM – 7:59 PM

Friday, 6/6: 9 AM – 6:59 PM

Saturday, 6/7: 9 AM – 6 PM

Sunday, 6/8: 9 AM – 6 PM (Exit only)

If you arrive outside the above operational hours for the gate, you will be turned away. **NO EXCEPTIONS!** Re-entry is available, however for those who don't request re-entry, there will be a \$40 fee.

Monday Exodus 6/9: 9 AM – 3 PM Monday Exodus requires pre-registration. Gates are exit only

What is Center Camp?

Center Camp is the central hub for Apogaea. Located near the effigy, you can learn more about the Ten Principles, grab a piping hot cup of coffee, purchase ice, sit back and groove to some live music, participate in a workshop, or just mingle with fellow Apogaeans. **Ice is \$2 per bag** (exact change only!) sold from 9 AM – 8 PM. Profits from ice sales go to local Bailey charities.

Volunteers Make it Awesome!

One of the best ways to *participate* is by signing up for volunteer shifts. It's a boat load of fun, and it really enhances your Apogaea experience. But what if you didn't sign up for a Volunteer Shift before arriving, and now you want to have this awesome opportunity? Not to worry! The Info Booth (located on the south side of Center Camp) will have a volunteer sign-up sheet throughout the event so you can still be a part of the well-oiled machine that is Apogaea. It's never too late!

Find out more about how you can be active in the Apogaea organization after the event and for next year – go to: www.apogaea.com/get-involved

Important Information about Fire

Apogaea is located in a region of extremely high fire danger. As such, most forms of open burning are not permitted including:

- Tiki torches and candles
- In-ground fires of any kind
- Campfires
- Unauthorized structure/art burns
- Open-top burn barrels or pits
- Unattended flames of any kind

Raised burn barrels or metal fire pits and flame effect art, using propane or liquid fuel are permitted with pre-approval only. Fire Performers do not need to pre-register. However, **all Fire Performers must check-in with the Fire Convergence tent** at the event.

The following requirements must be met to spin anywhere during the event:

- Check into the Convergence Tent: open Wednesday – Saturday, noon – 9:00 PM
- Bring any props you want to burn so they can be safety-checked.
- Attend the UFUG (Uniform Fire Use Guidelines) pre-event workshop or
- Take a UFUG safety workshop offered at the event: Wednesday at 5:30 PM and Wednesday – Saturday at 3:30 PM.
- Wear or carry the wristband you receive upon completion of the UFUG workshop.

All fire must be extinguished at the request of any Ranger or Safety Personnel. If you fail to comply with fire guidelines or verbal instructions from the Fire Performance lead, Rangers or Safety Personnel, you will not be allowed to light up for the duration of the event.

2014 Exodus Food and Household Goods Drive

During Exodus on Sunday, De-greeter volunteers will be collecting food to donate to the Mountain Resource Center, a community-based nonprofit organization that provides an array of services to people in Park County. When packing up on Sunday, please set aside your *unopened non-perishable food items and household goods*, so that you can quickly and easily pass them off to volunteers. Last year we collected over eight bins full of food! We hope to collect even more this year!

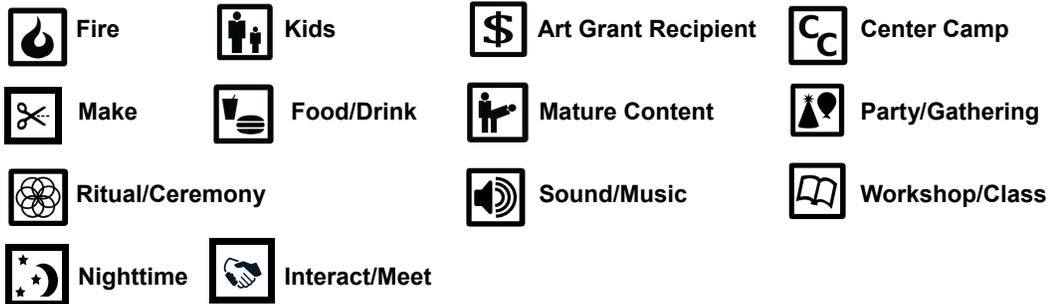

Apogaea is a LEAVE NO TRACE event!

Take a moment to remove all MOOP (Matter Out of Place) from your camp area and help to deMOOP in areas where you did not camp. Leave this land the same or better than you found it!

Info about Art Grants

Art grants exist to help volunteers create great projects for our festival. We fund any type of powerful and unique art. This includes but is not limited to sculpture, theme camps, sound, performance art, workshops, and mutant vehicles. We try to fund as many artists as we can and every year the total requested is greater than the budget. Some applications may be denied while others will not receive everything they ask for. Many artists supplement their grant by charging camp dues or holding fundraisers, often using sites such as Kickstarter.com.

Camp Amalgamation

Camp Amalgamation aims to bring people together with activities to facilitate interpersonal connection with other members of the Apogaea community. Activities include impromptu band creation (some instruments will be provided), preparing breakfast for various groups, and serving sweets freshly baked in our solar oven that we will also be offering for community use. The Green Hour Absinthe Dome

HATEbar

HATEbar exists to break up the mediocre hippie bullshit that seems to waft in the air at Apogaea. HATEbar is an oasis of assholes, punk rock, and shitty whiskey. We're not going to treat your ego with kitten-soft gloves, stroking you to an ego-gasm... We're going to insult your every sacred, blessed bit, and then give you shitty whiskey. Or maybe a well-shaken beer, if we like you. And we don't like you... in fact, we HATE you. We're open at various times every day, whenever we feel like it or have an event planned.

We'll have functions to gather over delicious food, and things like game night, fort-building, and a house party!

Check the WWWWW for listed events and times.

Families are welcome! Our space is PG-13; all children under the age of 13 should be accompanied by a supervising, chaperoning, in-charge of the child, ADULT.

Our space was also created with "Safe Space" in mind. As such, remember to observe personal boundaries, use consent, and help keep the camp feeling like a safe refuge where everyone can be free to let their inner child out to play.

The narwhals have recently defeated a band of space pirates. The narwhal king has taken the space pirate ship as his prize and will be giving away the raided stash of the space pirates. Pink Mammoth / The Fucking Unicorns

Pink Mammoth and The Fucking Unicorns have their roots at Burning Man, and are well established in the Colorado Burner community with their epic parties and active membership. The two camps have collaborated several times to put on exciting, engaging, very well attended events in the Denver area, and we're excited to collaborate again for Apogaea.

The energy of the camp is fun, uplifting, celebratory, inclusive, and relaxed. The centerpiece of the Pink Mammoth camp is a dance floor and bar with 4-corner sound under pink shade. The Fucking Unicorns will have a COIL stage as well as an improved playhouse and a granted art installation alongside. Both camps operate primarily during the daytime, and all attendees of any age are welcome anytime. The camps invite lots of interaction and socializing while dancing to signature deep Pink Mammoth music and drinking cocktails from the bar. We will be quiet during the evenings except for the last night of the festival.

Sofa King Mini Style – Home of The Big Couch

Here you will find the giant couch art project that John Costahau and I (Noah) funded and built for our camp "Basscouch" at the Burn. It's a huge 10 ft tall, 8 ft deep, and 24 ft long couch that up to 40 people can climb on and chill and relax on while listening to the hedd_sound system that I am bringing to Apo this year.

Space Camp

Spiro Camp / The Ties That Bind

Where The Party's At

Art Installations

Alfonzo the Pig!!!!

Alfonzo the Pig has wanted to come to Apogaea since he was a wee little piglet. He lives in Hampton, Nebraska and is coming to visit us here at Apogaea! We even have a special house already made for Alfonzo when he gets here, he gets cold and we have to make sure he stays warm!

Apoteague Wildlife Preserve

hosted by Shangri-LaLa

Inspired by Assateague and Chincoteague Islands that is home to a wildlife preserve with herds of wild ponies, the Apoteague Wildlife Preserve is home to a herd of toy ponies. It is an allegory for Apogaea: Although these ponies all are each expressing themselves radically, they are still part of the herd. Based close to and supported by Shangri-LaLa, the herd will do what a herd of ponies does. Roam.

Arbor Borealis

@ Dead Zeeb Society; brought to you by AudioPixel

A lush three-dimensional grid of super bright RGB LED spheres will become a moving hologram that represents the

environment around it. Literally "a forest of light", it strives to draw the viewer in until they are totally encompassed by the piece. As one gets near to the grid, their human form will become mirrored as a ghostly phantom shifting and glitching to every ambient sound.

Arcus Hymenoptera

What a colony can accomplish is greater than what one can achieve alone. These creatures will keep you company while you warm yourself in the heat created by them working in unity. While warming ponder what puts the fire in your heart, and what can be done to keep it there.

The Big Couch

@ King Sofa Mini Style

This is the giant couch art project that John Costahaude and I (Noah) funded and built for our camp "Basscouch" at the Burn. It's a huge 10 ft tall, 8 ft deep, and 24 ft long couch that up to 40 people can climb on and chill and relax on while listening to the hedd_sound system that I am bringing to Apo this year.

Burnin' to the Beat

viewable 10 PM – 5 AM

This project is an 8 foot Ruben's tube, which is a classic physics experiment to visualize sound waves which drive the rise and fall of flames along a perforated gas tube. The gas flow changes as the sound pressure inside the tube changes, rewarding the viewer with fiery sine waves when a tone is played, or complex fiery waveforms of constructive and destructive interference when music is played. In other words, we see the fire dance to the music.

Come watch sound on fire. Want to sing a song, heckle the crowd, tell a joke, play an instrument, or produce some music, and see what it looks like on fire? You can do that here! Want to see your favorite song on fire? You can do that, too! Bring your music containing device, hook it up, and be amazed. This is a spot to dance, talk, meet new people, and chill, all while watching responsive fire.

The Crystal Garden

viewable 8 PM – 5 AM

presented by Geological Point of Interest

An emergent system is only as good as the parts that comprise it. An event like Apogaea is only as good as the people who participate. That's where the Crystal Garden comes in! This unique lighting installation allows you, the participant, to control the light show all night long! An emergent system uses many unique variables to produce a beautiful final result. Come be our variables!!!

Cyclophone

hosted by Electron Village

The Cyclophone is an electronic instrument. It has a circular keyboard, various knobs and buttons, and a web interface. The circular keyboard is a little too big for one person to use, so it encourages multi-person use. The Cyclophone emits a variety of sounds depending on its configuration.

Dripstone Cavern

presented by Geological Point of Interest

Want to take a time out from the hustle and bustle of Apogaea? Come spelunking in the Dripstone Cavern, located at the Geological Point of Interest! The Cavern is an interactive, educational chill zone where you can learn about the emergent systems that create caves and crystals. Enjoy a cuddle puddle in the crystal pillow pit, or check out the crystal exhibit at the GPOI mineral museum because SCIENCE!!!

Emerging Absurdity

near the Gnomies where shenanigans and tom foolery reign supreme.

Silly and foolish the whole day through, might seem extremely unreasonable, but the Emergence of Absurdity is a look into that realm. Absurdity emerges from the Latin *absurdum* meaning "out of tune". Out of tune with a world that takes itself all too seriously. The incongruous juxtaposition of the worlds of serious thought and absolute absurdity dance with each other like a puritan and sparkle pony. The nightly metamorphosis of the spirit of pure unadulterated tom foolery is not to be missed.

Enlighten

dark - midnight

Enlighten is a combination of metal sculpture and propane fire art. A lotus flower made entirely of steel cans sits in the center of 8 computer controlled propane poofers, which will ignite in a display of fire frequently each night between dark and midnight.

EnLightningment

viewable 9 PM – 6 AM

hosted by *Electron Village*

EnLightningment is a light tunnel designed to surround the participants with lightning activated by the participants. The more the merrier is our motto as one person alone cannot activate all sequences; more than one switch will have to be activated at a time to achieve the full state of "EnLightningment!"

Ferox

Ferox means "ferocious" in Latin and overwhelms your mental processes with patterns out of phase. From chaos emerges clarity. This audio and light installation projects arrhythmic ambient sound a great distance from a 8 ft diameter parabolic dish, accompanied by strobe lights that project on the dish surface, slightly out of phase from each other and the sound.

Ignes Fatui

8 PM – 4 AM

brought to you by *Arizona Burners: Tattletale Frum and Boots Paramore*

Ignis Fatui will show you the way, or possibly lead you astray. Your companion and your guide, lights leading to unknown places and adventures or the safety and comfort of your own bed. Pulsing in time with their own meaning, meaning you can only discover by following them.

Ignis Fatui, meaning "Foolish Fire" in Medieval Latin, is made up of 40 self-powered, self contained LED light jars that communicate wirelessly and in unison. The lights are placed approx. 15 – 20 feet apart on either side of a road or path for 300+ feet. Various programs run throughout the night, enchanting viewers and leading the way.

Intergalactic Chuckwagon

The inspiration for this project lies in the old-west chuckwagon which would follow explorers and pioneers into parts unknown, essentially a kitchen on wheels, it was the center of camp life providing warmth and sustenance to hard working crews and their families. This interpretation of the vehicle is a semi-mobile, practical art piece, a nod to weathered wood, domed canvas roofs and cast iron skillet but with a whimsical, otherworldly twist. The Intergalactic Chuckwagon will be equipped with the necessary tools to bake, cook and freeze our way into other campers' hearts.

The Lifeguard Chair

@ *Fucking Unicorns and Pink Mammoth*

Apogaea faces serious safety concerns and legal liability due to swimming related accidents and injuries. To help protect Apo from liability and to reduce the likelihood of serious injury, Apo MUST have official volunteer lifeguards to protect attendees. The Lifeguard Chair is a wooden, beach-style lifeguard chair for two, and equipped with lifesaving floats and wooden shark fins to encourage interaction, role-playing and participation.

The Lifeguard Chair will be at the Fucking Unicorns/Pink Mammoth "pool" (aka dance floor) where Apogaeans can play as "lifeguards", "swimmers" (aka dancers), sharks or other water-borne threats (pirates, narwhals, semen spewing whales, etc.). During the day, there will be official unofficial lifeguards scheduled to "work" the Lifeguard Chair, but all Apogaeans are welcome to serve as lifeguards any time they want to!

Light Hive

Light Hive is a 12 ft x 3ft interactive, sound-reactive, hexagonal pixel panel wall.

Lumenexus

hosted by *Electron Village*

Lumenexus is an interactive electronic sculpture based on minimal surface geometry, built with circuit boards and steel. Its evocative shape is made of electronic cells that interact with each other, and respond to the sounds you make. Excite patterns of sound and color as you explore this mind bending technological artifact.

The Metaphaser

on view 8 PM – 11 PM (and maybe other times)

@ *The BeatWomb*

Come get Metaphased! You'll laugh, you'll gasp and you'll maybe even cry! Bring your friends, or partner up with any fellow Apogean, to have your faces melded together through an optical illusion. The Metaphaser uses varied light and 2-way mirrors to create this mind-blowing visual experience. Come play!

Mix & Match Belvedere

Based on the Mix & Match Woodblock concept, this hexagonal belvedere inverts that idea to mix and match the participants, using angled mirrors in a hexagonal belvedere.

Nucleus

Nucleus is a 19 foot tall pair of interconnected modular geodesic spheres, covered in LED panels, with a walkable set of platforms and steps leading through it. It is a meditative, temple-like space that interacts with and is brought to life by the presence of participants within it. The project's integration with participants provides a sense of interconnectedness as a reflection on community and cooperation with the environment.

Paulogaea Emerge-a-thon

The Paulogaea Emerge-a-thon is a multifaceted environment created from the blending of installations that have been showcased at Apo in various forms in the past 5 years. The installation will be centered around the Mirrazebo, wreathed around the Zeebo will be a selection of Bubble Lanterns spread around in the trees and Yucca planted around the space. The space will be colorfully lit and painted and will present a very fanciful and slightly psychedelic atmosphere for gathering, resting and socializing. This will also be the setting of a series of pop-up cafe events and small culinary events that are planned through out the event. It's also a great hiding place during hail storms!

Phoenix Rising

Primarily a metal installation, the Phoenix Rising bird will reside over her yet to emerge young chic eggs in her nest. The bird will contain flamethrower components that once belonged to the fire-breathing Draka the Dragon art car. The Phoenix Rising bird's eggs will be home to huge fire cannons. Settled under the wings of the bird, when they explode, the force of the blasts will rock the Phoenix up and back. Fire displays will take place at the Phoenix Rising installation several times each evening. The final night of the event the baby phoenix chicks will hatch and, if a burn ban is not in effect, we will time the igniting of the bird's nest with the cracking open of the eggs and birthing of the phoenix chicks.

Play Camp 360 Teeter Totter

The 360 Teeter Totter engages the community, inspires them to play and brings together the community by being fun and able to be used by multiple people at the same time. People of all ages walk away with smiles after interacting with this art piece.

poeTree

Short version: poeTree provides looping tracks of audio poetry in its "blooms" and a comfy place to sit and listen or relax. Attend our "poeTea" on Friday afternoon!

Dramatic version: On the way back to camp for refreshment and rest, you see a brightly colored flower at the edge of the path, and a sign with the first lines of a poem that beckons you to discover "poeTree." More flowers and poetry-lined signs lead you on a pleasant journey to a brightly colored tree, its trunk surrounded by a circular, roomy, cushioned bench. Emerging from the path, you take a seat. Looking up, you notice more of the brightly colored flowers from the path "blooming" on the tree. Putting one to your ear, which easily reaches you in your seated position, you may hear a grandfather reading a poem about masculinity for his grandson, a friend reading a poem of forgiveness, or a child giving Shel Silverstein a spin. You can listen as long or as little as you like. The poems loop on 8-12 different "blooms." You may hear the same poems again if you're patient, but you'll find plenty of variety, too. Recited poetry is being sourced from diverse groups (age, economic background, ethnicity) and on a variety of topics to ensure a diversity of core poetic types and concepts. All denizens of Apogaea can find a poem that speaks directly to their experience or emotional core.

Zen Generator

presented by Portland Burners Cross Pollination

Electrical coils pulse in a spiral, nudging a fractal-inspired magnetic wheel into chaotic motion. As momentum builds, the main wheel turns in a predicable manner: the cumulative effect of hundreds of random magnetic repulsions... just as our physical world is the result of countless unfathomable interactions at the quantum level.

Reality TV

hosted by The Living Room

This project is called "Reality TV", and is an interactive retro/futuristic video installation based in The Living Room. Reality TV is based around a collection of TVs, displaying both synthesized/reactive video effects, as well as effected and glitched live video streams. We will be utilizing analog video synthesizers as well as live camera stream and circuit bent video processors. An interactive "remote control" will modulate the aforementioned devices to provide visual stimulation to Apogaeans.

Refuge

Do you find yourself constantly surrounded by danger at Apogaea? Have the knife throwing machines, loud music, naked hippies, out of control art cars, and overall debauchorous nature of Apo become too much for you? Then come to the Refuge! The safest place at Apogaea! We know you need a safe place to escape and we here at the refuge are going to supply it for you.

Robot Resurrection

The Robot Resurrection is a 30 ft towering Robot sculpture made of recycled metal. It has fully articulating, arms, head, and hands. It has lasers shooting out of it's eyes, smoke billowing from every joint, and holds the power of fire within it's hands.

SoundPuddle

hosted by *Electron Village*

The SoundPuddle is an interactive space of visual-acoustic synesthesia. This spectrographically colorful dome illuminates sound on an immersive canopy of light. Visualize the spectral shapes of sound-space with any noise you can make. You will laugh, shout, and sing as thousands of solar powered LEDs unify your ears and eyes.

The Temple of Infinite Light (Temple)

The Journey begins with entering the Temple of the Heavens, crossing the bridge over to the Temple of Earth. Emerge onto the Earth to walk the Path of Infinite Life.

The Throne of the Emergent Multitude (Effigy)

The Emergent Multitude will be a wooden structure consisting of a 5-sided seating area, an elevated perch and 5 tentacle monsters of various forms emerging from the center column to a height of approximately 16 ft. Five flaming spires and a central pooper encircle the top of the structure to an elevation of 20 or more feet. All flame effects will be kept well above any wooden pieces, and will be removable for the burn. It will function as a gathering place and resting spot as well as an artistic expression. Those who sit under its tentacle canopy will be rewarded with a space like no other.

W.A.R.R.Y. M.E. – Wedding Altar to Rid & Remove Your Materialistic Excesses

As part of the first annual Wedding Dress Wednesday this year at Apogaea, a special stand alone Altar will be built for individuals, couples and groups to congregate at during the termination of the Wedding Dress Wednesday Camp Parade. In line with the Burning Man principle of Decommodification, inspiration will be encouraged of all participants to pledge going forward their commitment to love, honor and devotion of fellow human beings while ridding themselves of any and all physical or emotional attachments to the ever increasing materialistic garbage pile of commercialized and commodified stuff that has entered our already complicated lives and should never ever be mistaken for a substitute of human fellowship.

Wish You Were Here with photos at 8 PM – 10 PM

Our proposal is to build an interactive documentation station. We will construct 3-D letters that spell out “WISH YOU WERE HERE”. The letters will serve as a backdrop/foreground for its visitors to have their photo taken with. We are planning on using a digital camera and photo printer to take photos and immediately have a physical printout to give as souvenirs.

The project will be on display all day and night. The sign lights up and looks cool at night, so right after sunset is when we will be offering photos and printouts.

Participants get the opportunity to practice a new approach of negotiating sex verbally with others. They get to enact strategies for how to make explicit consent sexy and fun.

Crossing the Event Horizon – The Singularity Archetype and Human Metamorphosis

5:30 PM – 8 PM

@ Center Camp Performance Stage

Crossing the Event Horizon provides evidence that we are, both individually and collectively, hurtling toward an evolutionary event horizon. Using the tools of Jungian psychology, the nature of the singularity is defined by its myriad manifestations emerging from the collective unconscious. These include dreams, motifs and themes found in art, science fiction and fantasy literature and films, religious cults, and the paranormal, especially near-death experiences and UFO encounters. Key aspects of the Singularity Archetype include: "Logos Beheld" (visually comprehended linguistic intent often associated with a collective telepathic network), Homo gestalt (a new species where individuality is conserved but also telepathically networked), and a parallelism between the individual event horizon of death and eschaton (the collective event horizon of the species). Apocalypticism is analyzed as an example of the Singularity Archetype pathologizing. A study of the Heaven's Gate saucer/suicide cult illustrates what can happen when people become possessed by the Singularity Archetype and are driven by it into delusory projections. The Singularity Archetype is viewed apocalyptically by the ego, and as a transcendent evolutionary event by the Self, and the duality of these views is explored in many examples. The evolutionary origins of the ego and its metamorphosis as it approaches the event horizon are explored. Evolutionary theory, which relates to the Singularity Archetype through a number of dynamic paradoxes, is discussed. Many popular books and movies are analyzed as permutations of the Singularity Archetype, including: Avatar, Childhood's End, Village of the Damned, Powder, and 2001: A Space Odyssey.

The Hippie Hunger Games is an interactive Apo-Sport in which tributes attempt to rescue poor, defenseless woodland creatures and earn prizes and glory. Of course, this being Apogaea, success does not come quite so easily. For there are several rabid gladiators defending the woodland creatures. Their orders are to kill anyone trespassing into their realm. They will use whatever means available to them to stop the intruders, including swords, battleaxes, and crossbows. Think American Gladiators meets Katniss!

The top 32 players over the first three days will qualify to march in the parade and battle in the "Grand Tournament of Death" on Saturday From 1:00 PM until a champion is crowned! Can you survive the Hippie Hunger Games?

Shockingly Sensual Touch

6 PM – 7 PM

@ Center Camp Workshop Area

Do you love to give or receive sensual touch, whether soft and slow or loud and rough? Does it ever feel like that touch is electric? Well, try adding actual electricity. We will use Violet Wands (and/or Neon Wands) as we explore a range of sensations. On the gentlest setting, we can offer our play partners just a little extra tingle as we trace our fingertips along her curves, down his chest, through her hair. I like to establish a connection with new partners using no extra stimulation, listening and learning what they like and where. Then, gently introduce some electro, following their lead. And I'm always pleasantly surprised when she requests, "Turn It UP!"

Couples (and groups) can develop greater sensitivity and be more present as they play with each other. Many people who experience this "Fetish" begin to Crave it. Electro play can be an amazing addition to a sensual lifestyle. Come share in a luscious experience. Workshop will include quick discussion on safety and science (3-5min), introductory exercises, free form play, as guided as you like.

ATTIRE: I'm expecting participants to arrive and remain fully clothed (by APO standards at least :-') while we are at Center

Camp. However, this experience can be most enjoyable on bare skin. Also, clothing made with metallic fabrics and accents are extra fun to play with and add to our sensation.

WHAT TO BRING: Cushions for yourself and others to sit on or lay on. Open mind. Partner NOT required. A photo ID (everyone must be of age).

Written by members of BED

Participants – who range across the spectrum of gender, race, age, sexual orientation, and sexual predilection – learn about how to identify and express their own desires and boundaries in a sexual interaction as well as how to ask about and honor their partners' desires and boundaries. They learn the problems with assuming sexual consent based on physical "cues," including the fact that many people freeze when they perceive their partner's behavior as a transgression of their boundaries, and the fact that people misread nonverbal signals routinely. Participants get the opportunity to practice a new approach of negotiating sex verbally with others. They get to enact strategies for how to make explicit consent sexy and fun.

This workshop is designed to create a safe and provocative space to explore our shadows in intimacy.

The BeatWomb presents: NumiNative at Center Main Stage

6:30 PM – 7:30 PM

@ *Center Camp Performance Stage*

Bringing native sounds to the EDM world, NumiNative is an Eastern-inspired electronic duo from Boulder, CO. David DeVine and Phoenix Clay Michael fuse 21st century sophistication with ancient instrumentation including tabla, flute, dombek and didgeridoo. NumiNative is a combination of words: Numina being the Latin word meaning "of divine origin". The end result is a tasty fusion of dance/ambient/dub with traditional eastern musics. The set itself implements improvisational instrumentation and is largely a product of the energy present at the venue. NumiNative has a wide variety of sounds and influences ranging from contemporary EDM to classical Indian style music. Our set for this venue would probably endure for about an hour. The sounds of NumiNative blends the intention of music with meditation, and makes little distinction between the two.
